## CCNA Wireless Certification

Cisco Certified Network Associate Wireless (CCNA® Wireless) validates associate-level knowledge and skills to configure, implement and support of wireless LANs, specifically those networks using Cisco equipment. With a CCNA Wireless certification, network professionals can support a basic wireless network on a Cisco WLAN in a SMB to enterprise network. The CCNA Wireless curriculum includes information and practice activities to prepare them for configuring, monitoring and troubleshooting basic tasks of a Cisco WLAN in SMB and Enterprise networks

When it comes to in depth cisco questions  
Axell always has the answers.

# NETWORK TECHNOLOGY ACADEMY

**CCNA Wireless** recognizes the critical importance of professionals supporting wireless LANs including Networking Associates/Administrators, Wireless Support Specialists and WLAN project managers.

The **CCNA Wireless** Certification validates candidate's skills in the configuration, implementation and support of wireless LANs, specifically those networks using Cisco equipment. Students completing the recommended Cisco training are provided with information and practice activities to prepare them for, configuring, monitoring and troubleshooting basic tasks of a Cisco WLAN in SMB and Enterprise networks. Employers will be able to validate their staff have the skills needed for basic wireless networking on a Cisco WLAN in SMB and enterprise networks after completing certification.

Wireless is where the jobs are going to be!

## Sample of Course Objectives

Taking the NTAI Cisco CCNA Wireless Program will open many new doors that the CCNA alone can't offer.

## CCNA Wireless Certification Program

CCNA Wireless certifications are valid for three years. To recertify, pass a CCNA Concentration exam (wireless, security, voice), or pass any 642 – XXX professional level or Cisco Specialist exam (excluding Sales Specialist exams), or pass a current CCIE or CCDE written exam.

## The Exam

### Exam Description

The 640-721 Implementing Cisco Unified Wireless Network Essential (IUWNE) exam is the exam associated with the CCNA Wireless certification. This exam tests a candidate's knowledge of installing, configuring, operating, and troubleshooting small to medium-size WLANs. Candidates can prepare for this exam by taking the Implementing Cisco Unified Wireless Network Essential (IUWNE) course.

### Exam Topics

The following information provides general guidelines for the content likely to be included on the Implementing Cisco Unified Wireless Networking Essentials (IUWNE) exam. However, other related topics may also appear on any specific delivery of the exam.

## CCNA Wireless Certification Program

Network Technology Academy classrooms are equipped with new Dell workstations.

A CCNA Wireless certification will validate your ability to configure, implement and support wireless LANs using Cisco equipment. Join that growing number of IT professionals who can manage a wireless LAN configuration across all access points and stations by becoming CCNA Wireless certified.
