CCVP Certification

Cisco Certified Voice Professional (CCVP®) validates advance knowledge and skills required to integrate into underlying network architectures. Furthermore, this certification validates a robust set of skills in implementing, operating, configuring, and troubleshooting a converged IP network. With a CCVP certification, a network professional can help create a telephony solution that is transparent, scalable, and manageable. The CCVP curriculum focuses on Cisco Unified Communications Manager (formerly Unified CallManager), quality of service (QoS), gateways, gatekeepers, IP phones, voice applications, and utilities on Cisco routers and Cisco Catalyst switches.

CCVP Certification Program

Network Technology Academy has two convenient locations to serve you. One in Davis Square Somerville, MA 02144 and the other at 100 Pleasant St. Malden, MA 02138

*Put your knowledge and experience to the test.
Achieve Cisco CCVP certification.*

NETWORK TECHNOLOGY ACADEMY

The 642-436 **Cisco Voice over IP (CVOICE)** is the exam associated with the Cisco Certified Voice Professional CCVP® certification. This exam tests a candidate's knowledge of the foundational elements of VOIP calls, and the description of dial plans, and the implementation of gateways, gatekeepers and IP-IP gateways. Candidates can prepare for this exam by taking the CVOICE Cisco Voice over IP course.

The 642-446 **CIPT1 Implementing Cisco Unified Communications Manager Part 1** is the exam associated with the Cisco Certified Voice Professional CCVP® certification. This exam tests a candidate's knowledge of deploying a Cisco Unified Communications Manager to support single site and centralized call processing models. Candidates can prepare for this exam by taking the CIPT1 Implementing Cisco Unified Communications Manager Part 1 course.

The 642-456 **CIPT2 Implementing Cisco Unified Communications Manager Part 2** is the exam associated with the Cisco Certified Voice Professional certification. This exam tests a candidate's knowledge of deploying a Cisco Unified Communications Manager in a multi-site deployment model. Candidates can prepare for this exam by taking the CIPT2 Implementing Cisco Unified Communications Manager Part 2 course.

The **QOS** exam is one of the qualifying exams for the Cisco Certified Internetwork Professional, Cisco Certified Voice Professional, Cisco IP Telephony Design Specialist, Cisco IP Telephony Express Specialist, Cisco IP Telephony Operations Specialist, and Cisco IP Telephony Support Specialist certifications. The QOS 642-642 exam will test materials covered under the Implementing Cisco Quality of Service QOS v2.2 or v2.3 course. The exam will certify that the successful candidate has knowledge and skills necessary to configure and troubleshoot Cisco IOS routers running Quality of Service protocols in Service Provider and Enterprise environments. The exam covers topics on IP QOS, classification and marking Mechanisms, queuing mechanisms, traffic shaping and policing mechanisms, congestion avoidance mechanisms, link efficiency mechanisms, modular QOS command line interface, and QOS Best Practices.

The 642-426 **Troubleshooting Cisco Unified Communications Systems (TUC)** exam is the exam associated with the Cisco Certified Voice Professional CCVP® certification. Candidates can prepare for this exam by taking Troubleshooting Cisco Unified Communications (TUCv1.0) course. The exam will certify that the successful candidate has the knowledge and skills necessary to troubleshoot Enterprise CallManager, Unity, and IP network deployments. The exam addresses hands-on experience in configuring, deploying, and troubleshooting Unified Communications solutions see Claims and Components attached).

NETWORK TECHNOLOGY ACADEMY

The Implementing Cisco Voice **Gateways and Gatekeepers (GWGK)** exam is associated with the Cisco Certified Voice Professional CCVP® certification. Candidates can prepare for this exam by taking the Gateway Gatekeeper (GWGK) course. This exam tests a candidate's knowledge of the implementation of Cisco gateways and gatekeepers, including integration of a VoIP network to both PSTN and TDM equipment. Topics covered include implementing dial plans and advanced gateway features such as SRST and DSP resources, implementing gatekeepers and directory gatekeepers to provide hierarchical dial plan resolution, and call admission control.
