10 week course

NETWORK TECHNOLOGY ACADEMY

The CompTIA A+ certification is the industry standard for computer support technicians.

The international, vendor-neutral certification proves competence in areas such as installation, preventative maintenance, networking, security and troubleshooting. CompTIA A+ certified technicians also have excellent customer service and communication skills to work with clients. CompTIA A+ is part of the certification track for corporations such as Microsoft, Hewlett-Packard, Cisco and Novell. Other technology companies, including CompuCom and Ricoh, have made CompTIA A+ certification mandatory for their service technicians. More than 700,000 people worldwide have become CompTIA A+ certified since the program's inception in 1993. The CompTIA A+ certification exam has three separate tracks. The CompTIA A+ Essentials test, exam code 220-601, is required for each applicant. Then applicant then chooses a test to align with one of these three designations:

CompTia A+ Certification Program

Network Technology Academy's A+ program will provide you with the education and skills needed to pass the certification exams .

Our goal is to ensure your success in the PC Technician job market.

NTAI's instructors are patient and professional, no student gets left behind.
